## ABSTRACT

Cryptocurrencies have become increasingly essential to businesses in their daily operations. The majority of corporations have adjusted well to the growing digital investment given their budget surplus and muscles to change and advance the development of the world economy. On the other hand, Cryptocurrencies are readily accepted by the wider community, have the ability to grow faster, are easy to obtain, are affordable, and are secure.

The price of cryptocurrencies is determined by the holder, by mutual agreement.

We hope that Musa Blockchain will be the pride and best digital investment solution. We thank the investors and the Musa Blockchain community for their trust, and we welcome the Musa Blockchain Ecosystem. Together we form a decentralized digital economy change.

The purpose of this White Paper is to present the Musa Chain to give potential to token holders in connection. The information set forth below may not be exhaustive and does not imply any elements of a contractual relationship. Its sole purpose is to provide relevant and reasonable information to potential token holders in order for them to determine whether to undertake a thorough analysis of the Musa Blockchain

Certain statements and estimates for financial information contained herein constitute forward-looking statements or information. Such forward-looking statements or information involve known and unknown risks and uncertainties, which may cause actual events or results to differ materially from the estimates for the results implied or expressed in such forward-looking statements.

Cryptocurrencies have become increasingly essential to businesses in their daily operations. The majority of corporations have adjusted well to the growing digital investment given their budget surplus and muscles to change and advance the development of the world economy. On the other hand, Cryptocurrencies are readily accepted by the wider community, have the ability to grow faster, are easy to obtain, are affordable, and are secure.

The price of cryptocurrencies is determined by the holder, by mutual agreement.

We hope that Musa Blockchain will be the pride and best digital investment solution. We thank the investors and the Musa Blockchain community for their trust, and we welcome the Musa Blockchain Ecosystem. Together we form a decentralized digital economy change.

## INTRODUCTION

True Decentralization, The MUSA DAO decides any and all changes to the blockchain. Validators are voted in by other Validators. With VETO power granted to the DAO. I then dev will retire my validators once MUSA is stable. Validator rewards go back to the community (DAO) Contracts are not renounced, but locked in a smart contract controlled by the DAO Smart Contract Verification: All smart contracts must be verified and go through the verification tool This prevents a malicious dev from attempting to hide a method to scam the end user. Many other chains use bots for this purpose AFTER the token is launched. We force the developer to verify and submit smart contract for verification Verification tool will supply the user with the following: Taxes, Tokenomics, Max wallet, Honeypot checker, minting...etc. Think of one of the popular TG bots or tokensniffer.com (we are 100/100 btw) WAIT! There's more!! Every contract deployed on MUSA chain will need to have a mandatory liquidity lock for 7 days to begin with! This is an initial prerequisite to deploy contract on MUSA chain so that devs cant rug people immediately after launch. This 7 day period can be extended by the devs of those token. Also this 7 day gives all degens a time to review the project and Do their own research. In future we can extend this prerequisite based on what community demands via DAO governance. Easy to use Launch pad for launching projects with No Fee!! Are you a GREAT marketer, but cannot dev? We got you covered! Validator rewards goes back to the community Governance fund. Allocation and utilization of this fund will purely be determined by the Community via DAO Governance mechanism Also, if you haven't watched Dev Diary, below is the video of Dev explaining all features and updates related to MUSA chain!

## Fundamental overview

Musa Blockchain is one of the worldwide blockchain payment systems that offers its users a universal and similar environment in which to access and use cryptocurrency wherever and whenever they so choose. The crucial aspect of Musa Blockchain in comparison to its competitors that seemingly offer similar services is that Musa Blockchain will have ease of access and ease of use for all its customers. By offering a similar environment and a variety of platforms, users will have no difficulty logging in and overseeing their accounts and revenues.
